THE KAT

Published by the Journalism Class

Dedication

We, the annual staff, wish the Kennedale Kat to be dedicated to a person in the school who has given much of his time, effort, and spirit, and who has shown his unselfish service, his sympathetic understanding, his cheerfulness, his experienced leadership, and his great love for athletics.

Therefore, the 1965 Kennedale Kat is dedicated to Mr. Larry Fletcher.

ADMINISTRATION

SUPERINTENDENT'S MESSAGE

The American system of public education is oftentimes taken for granted, but this should not be the case. We should all be very thankful that here in America opportunity exists for all who will take advantage of it, and this is one of our most precious heritages. The American process of public education does not "run itself", but it requires the full support of all people to see that it continues to function, and that the doors for education and advancement remain open to all.

WHAT IS A CUSTOMER?

- A Customer is the most important person ever in this office
. . .in person or by mail.
- A Customer is not dependent on us. . .we are dependent on him.
- A Customer is not an interruption of our work...he is the
purpose of it. We are not doing him a favor by
serving him...he is doing us a favor by giving
us the opportunity to do so.
- A Customer is not an outsider to our business...he is a part
of it.
- A Customer is not a cold statistic...he is a flesh and blood
human being with feelings and emotions like your
own, and with biases and prejudices.
- A Customer is not someone to argue or match wits with. Nobody
ever won an argument with a customer.
- A Customer is a person who brings us his wants. It is our job
to handle them profitable to him and to ourselves.

**"There is a way
to do it better
— find it"**

These challenging words of Thomas A. Edison, father of the electric light and power industry, are a constant reminder to us to seek new efficiencies that will help us serve our customers better.

Through the years, as Texas Electric Service Company has built ahead, each new generating unit, transmission line and other facility has been designed to take advantage

of the advancing technology of the industry.

Texas Electric is looking to the future, constantly seeking new ways to improve electric service and make it an even bigger value.
